

Wexford Viking Glass are pleased to announce the addition of Integral Venetian Blinds to its range of products.

OptEblind

The ultimate glazing solution for windows and doors.

No Compromise with Safety or Hygiene!

Safety and **cleanliness** are a critical element in any home or commercial environment. Integral window and door blinds are sealed within an airtight environment, immune to dust, moisture and abuse. They are easy to operate by a simple magnetic slider (no hanging cords) that allows for maximum light, shading or complete privacy as required.

By controlling the diffusion of natural light, blinds help to reduce the effect of bright sunlight, yet allow natural light and heat in, thus improving a rooms year-round functionality and avoiding an over-reliance on air conditioning or artificial light.

Integral blinds do not interfere with the operation of windows, sliding patio or bi-folding doors; they stay clean, are fully controllable and, critically, cannot be damaged.

Integral blinds are an ideal refurbishment solution for windows, internal vision panels and doors. They are easy to operate with no compromise on safety or hygiene.

With no hanging cords or exposed slats to attract dust, integral blinds are **suitable for all types of educational, care and medical buildings** and maintenance is minimal.

OptEblind is available in **18 different colours** and will fit into most window and door frames or can be manufactured to suit individual requirements.

The blind can be encapsulated into **Energy Efficient** double-glazed units such as **OptEshield** if required, or alternatively encapsulated between two panes of low-iron glass which is exceptionally clearer than traditional float glass.

All **OptEblinds** are toughened in accordance with international standard **EN12150** ensuring safety is not compromised. They can be operated both manually or electrically depending on your requirements.

OptEblind is **Safe, Hygienic, Energy Efficient and Unobtrusive**

OptEblind

is available from most leading window companies or directly from
